

What's New in the 2004 NCCLS Standards for Antimicrobial Susceptibility Testing?

This program is free!

What is a Teleconference? Today, distance learning is one of the largest and most important applications of conferencing

bringing continuing education directly to your office, laboratory or other work setting.

- Simple, easy and affordable, teleconferences do not require sophisticated equipment.
- They allow multiple learners at your site to access the information at one time.

Special Needs and Information

In compliance with the Americans with Disabilities Act, individuals needing special accommodations should notify the NLTN at least two weeks prior to the course. For more information email: neoffice@nltn.org.

Continuing Education Credit

Continuing education credit will be offered to laboratorians based on 1.5 hours of instruction.

The National Laboratory Training Network

is a training system sponsored by the Centers for Disease Control and Prevention (CDC) and the Association of Public Health Laboratories (APHL). Prevention (CDC) and the Association State Laboratory Institute 3oston, MA 02130-3597 305 South Street

What's New in the 2004 NCCLS Standards for Antimicrobial Susceptibility Testing?

Teleconference

January 21, 2004 12:30 - 2:00 P.M. (EST) or January 22, 2004 3:00 - 4:30 P.M. (EST)

Speaker:

Janet Fick Hindler

National Laboratory Training Network

What's New in the 2004 NCCLS Standards for Antimicrobial Susceptibility Testing?

Description

Each January, NCCLS provides updated standards for antimicrobial susceptibility testing. It is important for clinical laboratories to incorporate the new recommendations into their routine practices in order to optimize detection and reporting of antimicrobial resistance. This teleconference will highlight the new recommendations found in the NCCLS M100-S14 tables which will become available in January 2004 and will replace the tables published in 2003.

Speaker

Janet Fick Hindler MCLS, MT(ASCP), F(AAM)

Ms. Hindler is a Senior Specialist in Clinical Microbiology for the Division of Laboratory Medicine at UCLA Medical Center in Los Angeles, CA. She is working this year with the Centers for Disease Control and Prevention (CDC), Division of Pathology and Laboratory Systems, through an Interagency Personnel Agreement, to develop and conduct training on antimicrobial susceptibility testing (AST).

Objectives

At the conclusion of this presentation, the student will be able to:

- 1. List the major changes found in the NCCLS M100-S14 tables.
- 2. Describe the new testing and reporting recommendations for *Staphylococcus* spp. to include detection of inducible clindamycin resistance and use of a cefoxitin disk test for detection of oxacillinresistance.
- Discuss use of the disk diffusion method for testing select antimicrobial agents against Stenotrophomonas maltophilia and Burkholderia cepacia.
- 4. Describe how to effectively use the new reference guide to quality control testing frequency.

This program is made possible by an unrestricted educational grant from Ortho-McNeil Pharmaceutical.

Register for January 21st or January 22nd!

Register before January 7, 2004 and receive a CD ROM of the speaker's presentation and other handouts.

Participation is Easy!

All that is needed to participate is an email address* and a regular telephone or a speaker phone. To enhance the teleconference, a computer and LCD projector can be used to view and correlate the handouts with the speaker's presentation. At the end of the program, you will have an opportunity to ask the speaker a question.

*Confirmation letters and all other communications for this teleconference will be through email.

- 1. There is no fee for this program.
- 2. Designate a site representative.
- 3. Complete the enclosed registration form and return it to:

Mail: NLTN, Northeast Office 305 South St. Boston, MA 02130-3597

or

Fax: (617) 983-8037

- Registration deadline is January 14, 2004.
- Upon receipt of your registration form, confirmation letters with teleconference details will be emailed.
- 6. Before the teleconference, download the hand out materials to your computer.
- 7. Duplicate the handout materials for the participants.
- 8. On the day of the teleconference, call the CDC teleconference bridge (call using one telephone line <u>only</u>). This allows all of the participants to be joined together with the program speaker for a high quality interactive educational experience.
